New Left Review (Zapata in Mexico and Gandhi in India, with Ambedkar and Nehru – the British Wealth Debates and Spanish Colonial Wealth Debates)
By Perry Anderson

Part I – The Originals

I. British Monarchism in India – Round Table Conferances and High Politics in India Throughout its Gandhi, Ambedkar and even Nehru politics – with a British Wealth Debate and finally the Capitalists also Intervening in this High Politics – Current Cinema on Deterior – a Fun Take on the Whole History

By Perry Anderson

What Hobsbawm calls the essential history of Indian politics in the agrarian countryside with the city general strikes of Ambedkar and Nehru then in fact being also the Modern India histories of Sumit Sarkar and Sirohi in fact which then organise two visions of Modern India – Sarkar with the traditional view of Gandhianism and popular struggles with some mention of what Sirohi calls finally capital, colonial monarchy and Christian living people in India with Ambedkar as the heroe of all and this process being contrasted and studied together for in fact Gandhi and Ambedkar as a face off in parliaments and all the history finally being –

One shard of rural politics and simplicity in high sophistry by Gandhi and one shard of modern India by Ambedkar with shards of new high culture in India of bourgeois crowds and then in fact another shard of capitalists in India and complex shards then of this debate in history.

II. Zapata as Counterpart in Mexico against Spanish quick and long movements of Colonial drain

By Jairus Banaji

I argue one shard in Zapata is his anti-colonial reform of peasants movements which then halts against the landlordism of haciendas which remains and this failure becomes then a whole history of modern Spanish colonialism entering Mexico and is a long history of a drain of wealth but actually a gain of wealth and this becomes the shards of Mexican peasant revolution and failed land reforms which is so many shards that reflect Zapata and his love for the poor and also his final argument on wealth being a simple theory like Gandhi which is actually about the true wealth of nations.

Part II – Walter Rodney on History in Footage – what a rare event to see Ambedkar and Nehru Debate Gandhi – the rarest films in history

I. Rare Cinema on Deterior

I argue the rare films on Deterior are about history finally and we are historians. It tells us a lot about the bourgeois revolution and the failed land reforms in India and the rise of the far right and even Gandhi's double role as left and right and this reflects the Mexican bourgeois revolution as similar failed land reforms and failed high politics towards modern far rights.

I argue from a Maoist perspective and I mean just that is being debated today in India with Sirohi being a success in overall senses. I mean Ambedkar is a key heroe in the whole debate and why India outdoes Mexico in today's capitalist and Communist India. I mean it is that Enlightened the Indian debate, compared to a poor Mexican parliament which divines nothing except a new PRI which means a far right and far left mixed state politics which attacks the Left even in Today's Mexico.
